Shoebox Scanning

About Shoebox Scanning

Shoebox scanning is a high-speed system of scanning that allows the staff at Pixels Plus to digitise large numbers of your precious photographs.

Pixels Plus are able to scan prints & documents from as small as 9cmx6cm up to 20cmx30cm or A4 and put them on to CD DVD or USB at a very low price.

The service is a great way to preserve all your photographs. You will be able to share them over the internet, easily make more prints and enjoy a digital slide show on your computer or TV (if TV supports jpg image preview).

Most prints and documents will be able to go through our high-speed scanning service, but delicate old photographs, Polaroid prints, mounted prints on card and torn or damaged photographs will need to be manually scanned, which also include manual enhancement.

Shoebox Scanning Prices

Minimum Charge is \$49.00 Per Order

Quantity	Per Scan
100-199 prints	49¢
200-299 prints	47¢
300-399 prints	44¢
400-499 prints	39¢
500-599 prints	37¢
600-799 prints	34¢
800-999 prints	29¢
1000+ prints	27¢
2000+ prints	24¢

Notice

Our high-speed photo scanning service is designed to digitally preserve your regular photos. This service is not designed to archive professional images with museum-quality clarity. We do provide both services and for individual high-resolution scans please consult the price list under [Film & Print Scanning Services](#).

Ordering Shoebox Scans

- Sort your prints in the order you would like them scanned, within their relative sizes.
- Please rotate your prints: For vertical images, make sure heads are to the right. For horizontal images, make sure prints are upright. We will rotate your images for you, at an additional charge of \$10 per 100 prints.
- If the prints are from different albums and or boxes you can place a paper marker cut to the relative print size between your prints e.g. with Europe Vacation 1990 written on it, and we will scan the marker along with your prints.
- If you're in the Sydney area, bring your box of prints to Pixels Plus. [Click here](#) for store location and hours.
- Outside the Sydney Area? [Contact us](#) for ordering instructions.
- Please fill out the ordering form. Use the link below.
<https://www.pixelsplus.com.au/files/shoebox%20checklist.pdf>

Shoebox Scan Add-Ons

- Order a 4x6 print of each image for only \$0.24 each when ordered at time of scanning.
- All images must be printed for this low price to apply.
- DVD Slide Shows cost \$45.00 and can be played on most home DVD players for viewing on TV. This service is great for birthday parties, special occasions and funerals.
- Add extra DVDs at \$15 each or extra CDs at \$5.00 each.
- Have your prints scanned at a higher resolution (600 dpi), charged at the same rate as 300dpi plus 50%
- Turn your scans into a collage. We can print on photo paper, adhesive wall paper or canvas.

Print Scanning Services

This service is for custom scanning and includes manual enhancement, we can scan to specific output sizes & resolutions with the intention of printing large prints or canvas. It is also for the scanning of torn, damaged, badly faded, off colour prints and if the originals need to be digitally restored.

*The maximum size of original we can scan for the below prices is 8x12 inches (20x30cm).
For sizes larger than this, 16x20 inches (41x51cm) being the largest, a quote is needed.*

Original Size scanning at 300dpi

Quantity	Price
1st print Scan	\$4.50
2-10 Print Scans	\$3.50
11 Plus Print Scans	\$3.10
CD of Print Scans	\$8.50
Upload to USB (Supplied)	\$3.50

Scans will produce a print size same as original print.

Higher Resolution Scanning

Final Scan Size in Inches / CM	Approx. jpg File Size in MB	Price per scan 1-5	Price per scan 6+
10x15 / 25x38	38.60	\$8.00	\$6.50
12x18 / 30x45	55.60	\$10.00	\$8.50
16x24 / 40x60	98.90	\$12.00	\$9.50
20x30 / 50x76	154.50	\$14.00	\$11.00
24x36 / 60x90	222.50	\$17.00	\$13.00
28x42 / 70x107	302.80	\$25.00	\$20.00

Video Transfers

Video tapes to DVD

We accept all domestic formats: VHS, VHS-C, Video 8, Hi-8, Digital 8, Beta Max, MiniDV.

Slide & Negative Scanning

Types of Film we scan:

- 110 & 126 "instamatic" unmounted positive filmstrip scanning
- 35mm, 110, 126, & 127 slide scanning
- 35mm negative scanning
- 35mm transparency scanning
- 120/220 medium format negative scanning
- 120/220 medium format transparency scanning
- 4x5 inch large format negative scanning
- 4x5 inch large format transparency scanning
- Microfiche Film
- Glass Plates
- Old Box Brownie and land camera negatives
- Custom high-end DVD slideshow authoring after scanning service.

It's a fact that negatives and slides deteriorate over time and the means of printing, scanning & copying them in the future will not be available as photo lab machines will be entirely digital only, as it is already with the likes of Harvey Norman. You don't want to wait until it's too late and find out that your precious memories have faded away, do you?

If you value your memories and want to preserve them the best option you have is film scanning. High-resolution scans are a great way to archive and preserve your history, because unlike film, digital files do not fade or colour shift on their own. Files can be copied in a few mouse clicks and storage media is fairly inexpensive. This means copies can be easily made and stored in multiple locations. Simple storage is not the only benefit of having your film scanned, there are many advantages to bringing your film into the digital age.

Once your slides and film have been scanned it can be restored to its original condition and even be improved. In most cases, colours can be brought back to life and fading restored. We do basic colour corrections and fading restoration on all our scans free of charge. However, many of our clients want further adjustments to improve the colour and composition of their photographs. People can be added or removed from your photographs, tears and scratches removed, colour photographs can be transformed to beautiful black & white and b&w photos can be colorized. The possibilities are endless!

All our scans are done individually by hand to ensure the highest level of quality possible. Materials are evaluated pre and post scan and adjustments are made if needed. Your materials are always handled professionally and with care, we know they are priceless to you.

When we've completed scanning your negatives, slides, or prints we return your original materials along with the CD or DVD containing the film scans. Our scans are labeled numerically so you can order photo restorations or prints from Pixels Plus at a later time.

If you order a CD or DVD they can be either in a data format or a slide show format.

Camera Repairs & Sensor Cleaning

Pixels Plus Camera Services and Repairs

We specialise in repairing professional brand name digital cameras and video cameras or camcorders such as Canon, Nikon, Sony, Panasonic, Pentax, JVC, Sanyo, Olympus, Minolta, Fujifilm, Casio, Leica, Tokina, Hitachi, Sigma, Tamron, Kodak, Samsung and all brands of photographic equipment, digital compact, DSLR, SLR, Film, HDD, Hi Definition, DVD, MiniDV, Etc....

We are committed to provide you with quality advice and competitively priced and reliable repairs. This includes all photographic equipment, digital cameras, camcorders and lenses.

We provide 3 months warranty on digital cameras, camcorders, professional cameras including flashes. And 6 months warranty on 35mm cameras and lenses.

Other services:

Other services that we provide includes: sensor cleaning, lens cleaning, flash repair, CCD cleaning, lens repair, shutter repair, light meter repair and flash gun repair. We fix most photographic related equipment whether they are an older model or the latest that are currently on the market.

Area of service:

We except goods for service locally or interstate.

The returning of repaired or non-repaired goods after service, will be charged a postage & handling fee.

This fee will vary depending on the weight and physical size of the goods to be returned.

Procedure for sending equipment for repairs:

(Only if you are not able to visit our shop - due to distance, outside sydney metro or interstate)

1. Fill out a [REPAIR FORM](#) and make sure to keep a duplicate copy for yourself.
2. If you have any queries, please phone us before mailing anything.
3. Pack the equipment in a sturdy box with at least 5cm of padding. Include the repair form in the box.
4. Only send the faulty equipment. Please do not send unnecessary accessories.
5. Send by registered post.
6. Once we receive the faulty equipment, we will contact you with a repair quote and timeframe for completion of the repair.
7. If you decline the quote, the equipment will be returned to you at a cost of \$30.00 for handling and freight.
8. Full payment is usually required before repairs are commenced.
9. Repair time is usually between 2 and 4 weeks, subject to parts availability.
10. Pixels Plus reserve the right to re-quote if an initially unexpected fault becomes apparent during repair.

Sensor Cleaning

If you start to notice foreign, dark, fuzzy specks or spots on your images and or photographs, you may need to have your sensor cleaned.

At Pixels Plus our professional staff provide a cleaning service of your DSLR image sensor. We offer a free evaluation and we will always try to use a non-invasive cleaning method at no charge. If the dust is stubborn, and a more intensive cleaning is required, you may have to leave your camera with us for a day or so. Below, please find our prices for this service:

APS-C Sensors from -

APS-C Sensors from	\$45.00
Full Frame Sensors	\$50.00

Please Note: Prices may vary depending on the severity of the clean and if any sticky residue is found on sensor.

We understand the risk involved with cleaning your sensor and we are here to help you!

Address for sending item for repair

Please Note: Price is for recovering files only. To CD, DVD or USB is at an extra charge.

Memory Card Usage

Digital Film (in other words a camera memory card) can be invaluable to replace so it's worthwhile knowing how to look after your card so you can get the most out of it in terms of longevity and reliable operation.

To get the best from your flash memory card, always:

- Use the correct memory card for the camera and follow the manufacturer's insertion instructions. Cards should slip in neatly if they are correctly orientated. Never force a card into a slot. Note: a few recently released digital cameras can accept two different types of cards, giving you a choice as to what to buy. Most such cameras let you transfer files from one card to the other.
- Make sure the connectors are properly engaged when inserting the card in its slot before closing the card door (you may need to check that the card lifting tab is right down first!).
- Make sure the card slot cover is properly closed before turning the camera on. Some cameras provide a warning beep if users attempt to switch the power on while the card slot door is ajar.

- Never open the card door while the camera is writing data to the card. Some cameras have indicator lights that come on while this happening; others blank out the LED monitor. If you stop data writing too soon, you'll corrupt the image files and may permanently damage the card.
- Look after your cards. Although fairly robust, they can be damaged by incorrect handling. Keep cards in a dust- and moisture-free container and away from direct sunlight and heat sources when they're not in use. Dust and moisture can affect connections between the card and the camera, preventing data from being transferred properly.
- Format cards before use and whenever you experience data transfer problems. Note: this will erase ALL data on the card and should therefore only be done when necessary.

Baby Passport biometric Photos	\$25.00

Take your own Photo and send it to us via Drop Box.

The cost for this service is \$10.00 and is only provided for well taken images that meet all of the photographic lighting & biometric guidelines of the passport or visa photo required. This is a great service for printing I.D. Photos that don't require strict guidelines.

If you have an Image that meets the Guidelines you can upload here:
